L.A. region becoming hub for ed-tech start-ups

The **Los Angeles Times** yesterday highlighted the Chamber's goal to position L.A. as the hub for educational technology. Silicon Valley and New York City are currently the areas most known for this

emerging digital sector, but Sean Arian, vice president of innovation and emerging technologies at the Chamber, noted, "If you look at what some of the best educational technology does, it integrates things that appeal to students — like gamification, video games and compelling narratives. L.A. does them better than any place else."
